- design for the required modifications to accommodate the comparator and to prepare the technical specifications and the construction drawings in such numbers as are required by the General Services Administration (GSA) (allowing for two extrasets of drawings and specifications for the sponsoring agency).
- 3. The engineering contractor is to provide such services as are required to accomplish the engineering phase of the work, including such surveys and investigations as may be required, the incorporation of such design data as has previously been acquired, incorporation with the manufacturer of the comparator and the and coordination with the manufacturer of the comparator and the representatives of the Government working with the manufacturer. Concept drawings are available and are to be used as guides for the engineering effort. The "black box" shown in the concept drawings is not in the contract.
- 4. The construction contract should provide for the completion of all construction work prior to 19 August 1969. In connection with this requirement, a CPM network should be specified targeting completion on that date.
